EmailSecurity

WHO WE ARE
WHAT WE DO

Libraesva is a leading cybersecurity company providing advanced email security solutions. One of the most innovative brands in the security world, Libraesva has a global customer base covering all major industries, from education and public sector to fashion and lifestyle.

We are 100% focused on delivering email solutions that educate and protect organizations and their people against increasingly deceptive and difficult to identify attacks. Every day, our team of security experts review, analyze, improve, and update our products to deliver the strongest and most flexible solutions for all organizations regardless of size or complexity.

We help educate organizations and people through a variety of resources and tools, such as our **Email Security Tester** and **PhishBrain** phishing simulator, plus a comprehensive **Knowledge Base** of email threats, technology, security, compliance, and best practices.

About Libraesva
Email**Security**

Email is the main data vehicle of modern business and the favourite vector of attack for cybercriminals.

- ✓ 96% of social action cyberattacks started with a phishing email*

- ✓ Business email compromise (BEC) scams caused over $1.8 billion of losses to business**

- ✓ In 2020 the average cost of a Data Breach was $4.24 million, 10% higher than the previous year ***

Libraesva Email Security is the most innovative and **effective Integrated Email Security Solution** that protects organizations from email-borne threats and data leaks, by providing an in depth analysis for all inbound and outbound email. There are no other cybersecurity solutions that protect companies like we do, with Libraesva's Unique and Proprietary Technologies which include: **URLSand Sandbox Protection**, **QuickSand Sandbox Protection** and an **Adaptive Trust Engine**, which provides a 360 degree protection against targeted email threats, such as Business Email Compromise (BEC), Phishing, Zero-Day Malware and Ransomware. Through these unique and innovative features, we aim to stay one step ahead of cybercriminals.
